PROFESSIONAL PROFILE

Detail-oriented MSc Computer Science graduate with strong experience in data management, quality assurance, documentation control, and administrative coordination within fast-paced operational environments. Currently working within Amazon ICQA (Inventory Control & Quality Assurance), supporting audit processes, discrepancy investigations, reporting accuracy, and compliance-focused operational activities requiring exceptional attention to detail and adherence to standard procedures.

Experienced in handling high volumes of data, maintaining accurate records, resolving queries, and coordinating with multiple stakeholders to support efficient operational delivery. Skilled in Excel, SQL, Power BI, reporting systems, and digital process management, with the ability to work independently, prioritise workloads effectively, and meet strict deadlines.

Demonstrates strong communication skills, organisational ability, and a proactive approach to problem solving. Passionate about contributing to healthcare innovation and clinical research through accurate data management, high-quality administrative support, and compliance with Good Clinical Practice (GCP) principles and research governance standards.

CORE SKILLS

- Data Management & Accurate Data Entry
- Documentation Control & Record Maintenance
- Audit Support & Compliance Monitoring
- Query Resolution & Investigative Reporting
- Microsoft Excel, SQL, Power BI & Digital Reporting Systems
- Administrative Coordination & Scheduling
- Stakeholder & Multidisciplinary Communication
- Quality Assurance & Process Improvement
- Attention to Detail & Organisational Skills
- Ability to Work Independently & Meet Deadlines
- Confidential Data Handling & Professional Conduct
- Process Documentation & Reporting Accuracy

PROFESSIONAL EXPERIENCE

ICQA Specialist (Inventory Control & Quality Assurance) | Amazon
Hull | Sep 2025 – Present

- Maintain accurate data records and perform detailed investigations into inventory discrepancies using internal digital systems.
- Support audit and quality assurance processes by reviewing data accuracy, resolving inconsistencies, and escalating issues where required.
- Work within strict operational procedures and compliance standards while meeting daily productivity and accuracy targets.
- Coordinate with team leaders and operational departments to ensure issues are resolved efficiently and documentation remains up to date.
- Perform detailed reporting and monitoring activities requiring high levels of accuracy and attention to detail.
- Assist with process improvement initiatives by identifying recurring issues and supporting corrective actions.
- Handle time-sensitive tasks within a fast-paced environment while maintaining strong organisational standards.

Team Leader & Technical Support Assistant | H&M; Digital Systems
Oxford Circus, London | Feb 2022 – Dec 2023

- Provided administrative and operational support across fast-paced retail operations, ensuring accurate system usage and issue resolution.
- Maintained internal documentation and supported reporting processes to improve operational efficiency.
- Assisted colleagues with troubleshooting digital systems and resolving operational queries in a timely manner.
- Communicated effectively with multiple stakeholders and departments to support smooth day-to-day operations.
- Supported staff onboarding and guidance on internal procedures and digital tools.

Graduate Developer (Projects & Data Reporting) | York St John University
London | Jan 2022 – Dec 2023

- Developed reporting and data analysis solutions using SQL, Python, and Excel.
- Conducted data extraction, cleaning, validation, and transformation activities to ensure reporting accuracy.
- Produced dashboards and reports for academic and operational projects.
- Worked collaboratively within team-based projects, participating in reviews, documentation, and testing activities.

Data Analytics Intern (Academic & Freelance Projects)
London | Jun 2024 – Aug 2024

- Analysed datasets and generated reports to support data-driven recommendations and process improvements.
- Created dashboards and visualisations using Tableau and Power BI to communicate trends and performance indicators.

- Performed data validation and quality checks to improve reporting reliability.

EDUCATION

MSc Computer Science (2:1) – York St John University, London

Focus Areas: Data Analysis, Software Engineering, Applied AI, Reporting Systems

Dissertation: Automation & Optimisation of Shift Scheduling using Data-driven Mobile Solutions

BSc Information & Communication Technology (2:1) – Swinburne University of Technology, Sarawak

Core Modules: Database Systems, Data Analytics, Mobile Application Development, Information Systems

ADDITIONAL INFORMATION

- Full UK work authorisation
- Available to start immediately
- Strong interest in clinical research and healthcare innovation
- Comfortable working independently and within multidisciplinary teams
- Experienced working within fast-paced, target-driven environments
- Committed to accuracy, professionalism, and continuous learning
